DEFINITIONS AND SPECIAL INSTRUCTIONS

1. Scope of Survey

This survey covers manufacturers of electric housewares and fans in the United States.

2. Figures to be reported

Companies with more than one establishment manufacturing the products covered by this survey are requested to complete a separate report form for each location. If you have not received a separate form for each of your establishments, please call the contact listed on the report form or write to the U.S. Census Bureau for additional forms.

a. Quantity and value of shipments

The figures on quantity and value of shipments should include the physical shipments of all products sold, transferred to other establishments within your company, or shipped on consignment, whether for domestic or export sale. The value represents the net sales price, f.o.b. plant, to the customer or branch to which the products are shipped, net of discounts, allowances, freight charges, and returns. Shipments to your own branches should be assigned the same value as comparable sales to unaffiliated customers, i.e., the value includes an appropriate allocation of company overhead and profit. Products bought and resold without further manufacture should not be included in shipments.

Include products shipped from your plant with private brand names as well as products shipped under your own company brand name.

b. Columnar structure of report

When entering your figures on the original report, please be sure to report the information in the correct columns.

These are: *Column 1— Quantity*
Column 2 – Value

3. Definitions

The product detail for this survey is defined according to standard nomenclature for this industry.

Electrothermal — Relating to the generation of heat electricity.

Electromechanical (includes cordless) — Relating to those appliances having a self-contained electric motor.

4. Comparability

If you also report in the Annual Survey of Manufactures (Form MA-10000), the sum of values for item codes shown in column (a) should correspond to the dollar values reported under product class codes indicated in column (b) below:
